

Frequently Asked Questions

Cleanups

How many cleanups should I do with my class?

You can do as many cleanups as you would like! But you are only required to do one cleanup to fulfill the program.

Where should I conduct the cleanup?

Preferably near a waterway, but any location that is accessible to you and your students is acceptable!

What is the best way to conduct the cleanup?

The best way to conduct a cleanup is to have a data sheet for every couple of students, while one picks up waste, the other students records it in the data sheet (what it is, what color, and amount). Every few minutes the couple of students bring their waste to a meeting spot, where 2-3 students can sort the waste to be diverted from landfill, and/or sent back to our recycling partner.

Given the success of our inaugural year of the Circular Economy Ambassador Program in 2021, we are overjoyed to lead the program again in 2022.

Act fast to be one of the first 20 classes signed up to be entered into a draw to win reusable, stainless-steel water bottles for you and your class!

Frequently Asked Questions

Data/Documents/Items

Who do I send the data sheet to?

Please take pictures of the sheet or scan it and email it to education@mindyourplastic.ca . We will insert the data on the spreadsheet for you!

Who do I send the pictures and videos to?

Please email it to education@mindyourplastic.ca

Where is your recycling partner and how do I send the acceptable plastics to them?

We will send you a Canada Post Label to put on the box with your plastic! All the information needed will be on the label so you do not have to worry about it!

What will the plastics be used for?

Our partners will transform the waste plastic into soap dishes, tire chalk, flower pots, tiles and many other items to be reinserted into communities creating a circular economy!
